

Ignition Coil Z00-17-014-00/-01

DATA SHEET

Description

Features

Enhanced output

Separate grounding point

50 kV continuous operation

Detachable connection possible

Replaces the most part of ignition coils of Altronic and Motortech ignition systems

Meets directive EN 55012

New high performance ignition coil with enhanced output and separate grounding point.

Intended to be combined with HEINZMANN Ignition Control System PHLOX-ICS.

Output voltage 50 kV in continuous operation. Temperature range up to 125 °C.

The spark plug cable can be fastened on the ignition coil directly with a screw. Alternatively with an adapter a detachable connection is possible.

Technical data

Temperature range	-40 ... 125 °C
Output voltage	Usek > 50 kV, continuous operation
Resistance, primary	1.1 Ω
Resistance, secondary	14.5 kΩ
